

PrimeFleet Solutions
Driving Fleet Efficiency Through Engineering Excellence

OPTIMIZE YOUR FLEET. MAXIMIZE PERFORMANCE.

ENGINEERING EXCELLENCE APPLIED LOCALLY

EAST AFRICA | 23+ YEARS OF INTERNATIONAL EXPERTISE

WHO WE ARE

PrimeFleet Solutions is a specialized engineering consultancy dedicated to bridging the gap between global logistics standards and local operational realities in East Africa.

We do not just supply advice; we engineer actionable, data-driven solutions that directly impact your bottom line. By implementing rigorous operational frameworks, we transform fleet performance, maximizing uptime, and reducing unnecessary expenditure.

23+ Years of Global Expertise

Led by founders with over a decade and a half of Tier-1 Fleet Engineering experience, we bring internationally certified operational frameworks directly to your fleet.

THE OPERATIONAL CHALLENGE

15%
MIN. COST
REDUCTION

Systemic inefficiencies cost fleets millions annually.

Sub-optimal specifications, lack of data-driven tracking, and untargeted maintenance drain budgets. We target these exact leaks.

Unplanned Downtime

Roadside failures leading to delayed deliveries and severe safety risks.

Poor CPK Tracking

Inability to accurately measure Cost Per Kilometer, resulting in blind procurement.

CERTIFIED PARTNERSHIPS

We implement standards and collaborate with the world's leading commercial brands: Mercedes-Benz, Bridgestone, Pirelli, ENOC, Kumho, and Vial Borrachas.

OUR CORE SERVICES

Actionable, data-driven solutions designed to keep your wheels turning safely and cost-effectively.

FLEET PERFORMANCE OPTIMIZATION

Data analytics, route structuring, and maintenance audits to maximize uptime and vehicle utilization across all assets.

TYRE LIFECYCLE MANAGEMENT

Complete CPK (Cost Per Kilometer) tracking, pressure mapping, and strategic retread planning to extend asset life.

OPERATIONAL COST REDUCTION

Comprehensive audits of fuel usage, maintenance schedules, and parts procurement to identify and eliminate waste.

DRIVER TRAINING PROGRAMS

Rigorous safety and defensive driving modules tailored specifically to East African road conditions and logistics demands.

THE PRIMEFLEET ADVANTAGE

Why Choose Us?

MEASURABLE SAVINGS

Our interventions typically yield a 15-25% reduction in overall fleet maintenance costs within the first year of implementation.

ENHANCED SAFETY

Rigorous compliance with international safety protocols to protect your most valuable assets and your drivers.

IMPROVED RELIABILITY

Preventative engineering strategies that drastically reduce breakdown incidents, keeping your supply chain moving.

METHODOLOGY

Engineering-Driven

We rely on telematics, geometry, and material science—not guesswork.

Local Application

International certifications applied directly to East African transport realities.

Lifecycle Extension

We engineer systems to ensure your current assets last longer, yielding higher ROI.

PARTNER FOR PERFORMANCE

Allow our engineers to analyze your data and deliver actionable insights. This is the first step toward maximizing your fleet's true potential.
